

## Bowman Power fundraise and beat the competition at the Great South Run

24<sup>th</sup> October 2018

[Bowman Power Group Ltd](#) (Bowman) fundraised for Asthma UK at the Simplyhealth Great South Run and placed first in the Men's Medium Business challenge, with the fastest group time overall. This achievement follows weeks of training and fundraising at the company's office in Southampton UK.

Ten runners entered from Bowman, covering a range of experience levels, from first-time runners to Ironman competitors. Across two teams, the runners' times were added together for team totals, from which Bowman placed 1<sup>st</sup> and 6<sup>th</sup> out of twenty companies.

Those who didn't run also got involved, with a cake sale helping to raise funds and support the runners before the event.

As a result of their hard work Asthma UK have named Bowman as their fundraising team of the week. The team's fundraising page [can be found here](#), and further donations are expected this week once those collected offline are added to the total.

Paul Dowman-Tucker, CEO of Bowman, added "I'm very proud of the team's efforts in both supporting a local event and in raising such a large amount for Asthma UK. There's been a real buzz about the race throughout the office and I look forward to seeing more from our team as they continue to fundraise and compete in the future."

Bowman's runners were Angus Wooding, David Wood, Gael de Crevoisier, James Prenter, John Konnakottu, Kamran Ishtiak, Marcus Lee, Mike Hartridge, Owen Creese-Smith and Steve Wallington.

## **ABOUT BOWMAN POWER GROUP**

Bowman is a provider of engine efficiency solutions including the design, development, installation and ongoing maintenance of high speed electrical machines. They help customers to generate additional power, reduce emissions and reduce fuel consumption.

Their award-winning Electric Turbo Compounding (ETC) technology has been deployed worldwide, generated in excess of 620GWh of free energy and saved over 300,000 tonnes of CO<sub>2</sub>. The majority of major engine and genset original equipment manufacturers (OEMs), large independent power producers and a global leader in the rental sector have all used Bowman's technology to improve genset efficiency.

Bowman is supported by a number of leading investment companies, including Ombu Group, Fjord Capital and Octopus Ventures. The company is based in Southampton, UK, and employs approximately 70 staff.
