

Bowman Power Selects Asthma UK as charity partner

14th September 2018

[Bowman Power Group Ltd](#) (Bowman) is delighted to announce they have selected [Asthma UK](#) as their charity partner for the remainder of 2018 and 2019.

As a provider of energy efficiency technologies that help reduce carbon emissions, Bowman were keen to find a charity that fit with their values. They evaluated several different charities and felt Asthma UK were the best fit with their goal “to be passionate about our technology, the environment and our company”.

Wendy Stansfield, Head of HR at Bowman, worked directly on the team that chose the charity. She commented “Asthma UK’s leading work in research and development, campaigning and working directly to help those with asthma really resonated with our team. They have a great programme of events, and we have a very active organisation that are keen to get involved. We can’t wait to start fundraising.”

Louise Thomas, Head of Events and Community Fundraising for Asthma UK said: “We want to say a heartfelt thank you to Bowman for choosing Asthma UK as their charity partner for this year and next. Asthma UK does not receive any government funding and it is only through generous supporters, like the staff at Bowman, that we are able to support the 5.4million people in the UK who have asthma. The money raised will help us to provide one-to-one advice and support through our helpline nurses, fund ground-breaking research into a cure for asthma, and campaign to improve asthma care.”

Bowman have already committed to supporting Asthma UK at the Simplyhealth Great South Run in October and will be delivering a programme of other fundraising activities in the coming months.

ABOUT BOWMAN POWER GROUP

Bowman is a provider of engine efficiency solutions including the design, development, installation and ongoing maintenance of high speed electrical machines. They help customers to generate additional power, reduce emissions and reduce fuel consumption.

Their award-winning Electric Turbo Compounding (ETC) technology has been deployed worldwide, generated in excess of 620GWh of free energy and saved over 300,000 tonnes of CO₂. The majority

of major engine and genset original equipment manufacturers (OEMs), large independent power producers and a global leader in the rental sector have all used Bowman's technology to improve genset efficiency.

Bowman is supported by a number of leading investment companies, including Ombu Group, Fjord Capital and Octopus Ventures. The company is based in Southampton, UK, and employs approximately 70 staff.

ABOUT ASTHMA UK

Asthma UK's mission is to stop asthma attacks and cure asthma. They do this by funding world leading research, campaigning for improved care and supporting people to reduce their risk of a potentially life-threatening asthma attack.

Asthma can leave people gasping for breath. It affects people's work and relationships and asthma attacks claim the lives of three people in the UK every day. That's why the work of Asthma UK is vital, to fund research into a cure for the condition and offer health advice to help people with asthma stay well.

In the UK, 5.4 million people are currently receiving treatment for asthma: 1.1 million children (1 in 11) and 4.3 million adults (1 in 12). Every day, the lives of three families are devastated by the death of a loved one to an asthma attack, and tragically two thirds of these deaths are preventable.

From running the London Marathon to trekking the Great Wall of China, and even baking tasty traybakes, there are many ways to fundraise for Asthma UK.

The Asthma UK Helpline is open weekdays from 9am to 5pm on 0300 222 5800. For more information on how to get involved in fundraising for Asthma UK visit www.asthma.org.uk/fundraising
